MIDDLE SCHOOL SCIENCE FAIR UPDATE - Level V Students Lydia Shannon, Evan Davis Drennan and Danny Housley represented the South Shore Charter Public School at the State Middle School Science Fair in Worcester, Massachusetts on Saturday, June 3rd. There were over 200 projects represented.

Lydia's project explored the plausibility of finding life on other planets, by experimenting with microscopic crustaceans in low oxygen environments. Evan attempted to engineer magnetic levitation through a series of circuits, which he researched and assembled independently. Danny built Sterling engines, which are high yield energy output devices. He was unsatisfied with the design that he was initially presented with and changed it three times until he landed upon the design that produced the best result.

The students and their families reported that they were impressed with the level of achievement shown by our students and others assembled. Families were also impressed with the quality of the judges. Each project was judged by a representative from the field that had been researched. There were representatives from biotech, software and engineering firms. Our students represented us well.
