

## **2019-2020 High School Supply List**

**Every student in the high school is expected to be prepared each day for every class they attend. As each discipline requires different tools for study, each class is different. During your first week of class your teachers should make it clear what materials you need. If you are unsure please ask your teachers. Being prepared for class is your first step to success.**

**Students taking Pre Calculus, AP Statistics, or AP Calculus are required to have graphing calculators. Graphing calculators are also recommended for students taking Statistics or Algebra 2. Models TI-83 or above are recommended.**
